DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

5 I. Claims 1 and 5-8 are drawn to a cryptographic method, classified in 713/190 (*Data Processing Protection Using Cryptography: Computer Instruction/address encryption*).

II. Claims 2-4 are drawn to a method of arithmetic processing and calculating, classified in 708/200 (*Electrical Digital Calculating Computer, Particular Function Performed*).

The inventions are distinct, each from the other because:

10

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility because it discloses solving a system of equations without the use of cryptography. See MPEP 806.05(d).

15 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. A complete response to this requirement must include an election of the invention to be examined, even if the requirement is traversed.

20

Conclusion

A shortened statutory period for response to this action is set to expire one month (not less than 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
